

Revit® 2016 Collaboration Tools

This class is designed to be one day and focuses on project collaboration. Students should be comfortable with the fundamentals of Revit as taught in one of the Revit 2016 Fundamentals courses. Knowledge of basic techniques is assumed, such as creating walls, roofs, and other objects, copying and moving objects, and creating and working with views, etc.

Learning Objective

The objective of the Revit 2016 Collaboration Tools training guide is to enable students who have a basic knowledge of Revit to increase their productivity while working with other people on a team, either in the same firm or with other firms, and while working with Revit files or other CAD files.
