

Revit® MEP – Template Configuration

This class is designed to be one day and focuses on configuration of Revit® for the MEP disciplines. Students should be comfortable with the fundamentals of Revit® as taught in the Revit® MEP Fundamentals course. Knowledge of basic techniques is assumed, such as placing equipment, creating systems, scheduling, etc. Students are encouraged to utilize this class to help configure their own template file during class.

Learning Objective

The objective of the Revit® MEP Template Configuration class is to enable students who have a basic knowledge of Revit® to understand settings and configuration issues to create a better template file for Revit® MEP usage.
